

Oct. 1.

Hi Judy,

How are you? I hope that things are well and that you are totally settled into your new position. Things have been very slow on this end. I have been experiencing these excruciating headaches. I take Tylenol and Motrin, but they don't help. I haven't been able to get anything done. Sleeping alot. Consequently, Judge Shaboz is furious with me for flouting his Scheduling Order. He continues to give me a rough time.

I do have some receipts to send the John Brown Education Fund and I hope to do that soon. I've also got to write a progress report for Resist. I did send them the 501(C)(3) determination letter and some other materials.

Have you ever thought of writing a book on prison + Aids? I called the bookstore and there is no books on prisons and Aids. That's really unfair. Perhaps,

we should write one.

I am really hoping that my transsexual case settle this coming week. Really, I wanted to pursue the case in the hopes of setting some kind of precedent. But, I am receiving no support from the gender community. And, I really think it is a shame that the gender community doesn't come together and do something about this situation. They could do it!

Today, I saw my "team," 'yeah, a phony title... Anyway, my unit manager said with your HIV status eventually it's going to kick you over. I could have slap the shit out of him. He didn't have to say that! Even if, it's true - - it's very depressing. So, he spoiled my day.

Sis, I am here to let you go now, but do keep in touch and I will do the same. Love ya,
Dell
